

For supporting our development, we are looking for

## **CNC programmer/operator**

### ***Our offer, your future***

Delta Engineering is the European market leader in factory automation for the blow moulding industry. Started as a two-man business in 1992, today the company is working with more than 100 qualified and dedicated employees.

Together we develop a wide range of innovative and efficient quality machines in close cooperation with our customers. So we guarantee a stable position on the market and a promising future for our company and our employees.

### ***Job description***

- To be responsible for programming and operating CNC lathes and milling machines

### ***Job requirements***

- At least 5 years experience in a similar job
- To be able to work independent, and to take initiative
- To be able to transfer a drawing in a CNC program
- To optimize the working methods and the tools selection
- To have a flexible attitude

### ***Our offer***

- A chance for specialization in domain, to work in a young and growing company, next to an enthusiastic team; to work for a financially healthy company with a leading name and a clear vision of the future
- To continue your education and knowledge achievements
- A financial compensation, proportional with your experience and contribution
- A group health assurance
- Meal tickets
